

# THE RISE IN SEA LEVEL

The latest report of the Intergovernmental Panel on Climate Change (IPCC) stated that the increase in the level since 1990, has been **faster than at any other time of the last three thousand years.**

Source: NASA

## THE RISE IN SEA LEVEL

Sea level rise is linked to factors caused by **global warming**:

The expansion of water due to the increase in temperature of seas and oceans.

Melting glaciers:  
Melting ice on  
mainland

# THE RISE IN SEA LEVEL

## What's happening in Chile?

Given its extensive coastline, Chile could be particularly affected by **rising sea levels**.

Sea level rise has a number of impacts negative effects, including the loss of natural habitats, flooding of coastal areas or the retreat of the coastline.
